DETAILED ACTION

Applicant's election without traverse of the invention of Group I (claims 1-21) in the reply filed on March 17, 2005 is acknowledged. Accordingly, claims 22-36 are hereby withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected invention, there being no allowable generic or linking claim. The renumbering of the claims is also acknowledged,

Information Disclosure Statements

The information disclosure statements filed October 15, 2002, November 25, 2002, June 12, 2003, November 10, 2003 and May 16, 2005 have been made of record and the references cited therein have been considered by the examiner.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 15 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 15 recites the limitation "the locking mechanism" in line 1. There is insufficient antecedent basis for this limitation in the claim.

Claim Rejections - 35 USC § 102

Application/Control Number: 10/099,634

Art Unit: 3739

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-3 are rejected under 35 U.S.C. 102(e) as being anticipated by Higuma et al. (U.S. Patent No. 6,547,721).

In regard to claims 1-3, Higuma et al. teach an endoscope 1 comprised of an insertion unit 2, an operation unit 3 and a universal cord 4 (see Figure 1). Insertion unit 2 has a bendable part 9 having bending pieces 32 that actuate to bend the bendable part 9 via actuation of bending lever 11 (see Figure 3). An armor tube 35 made of a polymeric material, such a fluorine-contained rubber, surrounds the insertion unit 2 and bendable part 9 (see Figure 3 and col. 8, lines 10-14). Higuma et al. also teach a moisture absorptive member 158 that, as broadly as claimed, constitutes a moisture sensor disposed within the armor tube 35 to detect moisture.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Application/Control Number: 10/099,634

Art Unit: 3739

Claims 7-9, 11-16 and 19 are rejected under 35 U.S.C. 103(a) as being unpatentable over Higuma et al. (U.S. Patent No. 6,547,721) in view of Ishikawa et al. (U.S. Patent No. 6,071,233).

In regard to claims 11-13 and 19, see the above rejections for claims 1-3. With further respect to claim 11 and in regard to claims 7-9 and 14-16, Higuma et al. are silent as to a coupling including a locking mechanism that attached to armor tube 35. However, Ishikawa et al. disclose a channel tube 2 that is coupled to an endoscope to allow the passage of instruments via a fixing tape 42 (see Figures 3A and 3B). Higuma et al. thus demonstrate that channel tube 2 that detachably couple to the exterior of an endoscope via a flexible strip locking mechanism are well known in the art. Accordingly, it would have been obvious for one of ordinary skill in the art at the time the invention was made to provide the endoscope 1 of Higuma et al. with the channel tube 2 and flexible tape 42 of Ishikawa et al. as a means to attach an additional tool tube to the exterior of the endoscope.

Claims 4-6, 20 and 21 are rejected under 35 U.S.C. 103(a) as being unpatentable over Higuma et al. (U.S. Patent No. 6,547,721) in view of Ishikawa et al. (U.S. Patent No. 6,071,233), as set forth above, and further in view of Abe (U.S. Patent No. 6,669,628).

In regard to claims 4-6, 20 and 21, Higuma et al. and Ishikawa et al. are silent as to a memory unit disposed on the endoscope 1. However, Abe discloses an endoscope having a memory 33 for storing data (see col. 3, lines 25-32). Abe thus

Application/Control Number: 10/099,634

Art Unit: 3739

demonstrates that endoscopes having the ability to store data are well known in the art.

Accordingly, it would have been obvious for one of ordinary skill in the art at the time the invention was made to provide the endoscope of Higuma et al. with the memory 33 discloses by Abe.

Allowable Subject Matter

Claims 10, 17 and 18 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Beverly M. Flanagan whose telephone number is (571) 272-4766. The examiner can normally be reached on Mondays, Tuesdays and Thursdays.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Linda C.M. Dvorak can be reached on (571) 272-4764. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
